1.

a) $2\text{ms} + 3\text{ms} + 3\text{ms} + 3\text{ms} = 11\text{ ms}$

b) $2\text{ms} + 3\text{ms} + 3\text{ms} + 3\text{ms} = 11\text{ ms}$

c) Fig 1: 11ms Fig 2: 5ms

2.

404 – not found, server hasn't found anything matching given uri. Often returned when page has been moved or deleted. Indicates that server was found, but server was not able to retrieve the requested page.

501 – Not implemented, server doesn't support required to fulfil the request.

201 – Created, the request has been processed which result in creating new resource.

301 – Moved permanently, this code is used for permanent redirecting, that means that links or records returning this response should be updated,.

3.

POST, it indicates that resource has been created without any errors. It will return code 201 most likely because code 201 is about creating resources.

4.
